

Project Team Recognition Stories

100 Things Were Done

by Shirley Lee (01/25/98)

One hundred web things were done.
Wow, what a support web team!
They move so fast,
Yet, their progress can be seen!

Over one hundred things were done,
And not just in phase one.

They moved to phase two
And still got more to do.
They twirled their logo.
They set-up their TOC.
They worked really hard
To beat calendar and clock.

Over one hundred things were done.
They didn't miss an action one.

They converted to text.
They converted to HTML.
They got Front Page.
Things were going well.
Puzzles and templates,
And graphics that looked great.

Over one hundred things were done.
The web battle was won.

They really got it out there
And enhanced it too.
FAQs and tips soon to share...
One hundred web things are done!

300 More Things Are Done

by Shirley Lee (04/29/98)

300 more web things are done!
Support Web team quick as a flash,
Finished up Phase II,
Then planned a big bash.

Over 300 things were done.
That team is faster than the rising sun!

They developed a conversion strategy.
They asked for volunteers
From every team they did meet.
Over 100 researched training and
documentations,
Moving items from MSG to Forms to
EWeb...
Then updating 250 plus Expert Advisor
solutions.

Over 300 things were done.
Sub-directories and standards weren't
shunned.

Many more learned HTML
And some thought they were most likely
In Front Page double L
When their graphics and links
disappeared.

Over 300 things were done.
The teams' QC battle had really begun.

Their Phase II battle cry
"Death to TIOLR, EF, and IMS menu!"
(A few said it with a sad sigh...)
They even told the customers too,
Please bid a fond farewell
To good old HeLPU.

Over 300 things were done...
Yet no members strayed, nary a one!

They even got to Phase III
With Laptop, Office 97, and IBMAV.
All of Phase III and IV
Will also soon be out the door!

300 Things Were Done

by Shirley Lee (07/23/98)

300 Web things were done
Since May 98 had begun.
That Support Web team on the run.
Constantly getting things done.

They added 1998 Metrics tables.
They added a User Guide index,
Which contained no fables.

They put in links
To Netscape, WinDial, Xstart,
WinVN
Then they did think
We'll put in even more helpful links!

Many used EA tact,
When editing more solutions.
Over 250 to be almost exact.

They added Workstation sites
For Win95, ICG, and Datashares
They went about their business
As if they hadn't a care.

They added Business system sites
too.

They called them DLS-Labor
And Data Warehouse improved!

They received feedback galore
And still anticipate more...
It was quite a chore
To finish actions before July 24.
